Experience

Front-End Developer Freelancer   01/2024 – Present

Worked on multiple projects for real clients and with over two years of experience I developed serious skills in the languages and technologies I use. Ensured clear understanding of project timelines and expectations.

Skills

- HTML5, CSS3 (Flexbox, Grid, Responsive Design)
- JavaScript
- Git & GitHub
- React
- TypeScript (basics)

Projects

⊙ Country Info App   JavaScript, HTML, CSS, API

- Built a responsive country info app that fetches real-time data using REST Countries API.
- Features: country search, display information about the country, error handling.

⊙ Personal Finance Tracker   JavaScript, HTML, CSS

- Built a responsive personal finance tracker with calculated balance.

- Features: Add and remove income and expenses, with automatically calculated balance.

- Every income and expense added by the user is displayed on the page.

⊙ Expense Tracker App   JavaScript, HTML, CSS, LocaStorage

• A responsive web – app that tracks expenses and their amount.

• Features: Every added expense and amount are saved in LocalStorage.
